| 4                | Aluminum Face Plate<br>Size: 18" Inner, 26" outer<br>Material Composition: Machined from structural 6061-T6 aluminum. This metal ensures the plate is highly warp-resistant and lightweight, yet completely non-sparking for hot-work safety.<br>Self-Centering Pins / Cones: Paired with adjustable, slotted sliding pins or threaded cones that slide smoothly through the faceplate slots into the bolt holes of a pipe flange.<br>Integrated Leveling Slots: Features precision-cut radial, horizontal, and vertical slots that hold manual bubble vials or digital levels to verify the exact axis.<br>Purpose: An aluminum faceplate (or pipe flange aligner) used in pipe fabrication is a precision setup and geometry tool designed to align bolt holes, level flanges, and ensure squareness before welding. It allows pipefitters to establish a true vertical or horizontal axis relative to the centerline of the pipe layout.<br>Cutting and Threaded along with Polish | 3        | Num  |                                 |                                  |          |                                    |

| 8  | <p>MS (Mild Steel) Pick-axe with Wooden handle,<br/>Head Configuration: Dual-sided geometry featuring a sharp chisel edge on one tip (for cutting roots and prying) and a pointed pick on the opposing end (for fracturing rock/hard clay).<br/>Hardness Rating: Typically tempered along the working ends to an HRC rating of 48 to 52 to preserve edge retention without rendering the core body brittle.<br/>Eyelet Design (Oval/Round Eye): Center eyelet features a standardized tapered slip-fit collar (generally 50mm x 70mm oval diameter). The handle slides down from the top, mechanically wedging itself tighter with every downward strike to prevent the head from slipping off.<br/>Surface Coating: Sealed in thick anti-corrosive powder paint or black bitumen enamel to halt environmental rusting when left in outdoor work zones.<br/>Head Weight: approx 2.5 kg<br/>Length of Pick-axe (without handle) tip-to-tip: 550-600 mm<br/>Handle: Made of hardwood<br/>Length of handle: 3 ft</p> | 8 | Num |  |  |  |  |
| 9  | <p>MS (Mild Steel) Shovel with Wooden handle<br/>Blade Material: Pressed or hot-rolled Mild Steel (MS).<br/>Blade Thickness: approx 2 mm.<br/>Hardness Rating: Tempered along the front leading edge to a minimum of 35 to 48 HRC to prevent curling or denting when scraping stone aggregate or hard concrete surfaces.<br/>Finish: Coated in an anti-corrosive powder or industrial black enamel to prevent rusting.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 8 | Num |  |  |  |  |
