2.0 DESCRIPTION OF PROJECT

2.1 Description of Project

The works to be constructed under the Bidding Documents for Description of Project “**INSTALLATION OF 14 kw Solar At CRICKET House**”

Statement of Works – Installation of 14 kW Hybrid Solar PV System with 16 kWh Battery Energy Storage System at Cricket House, Lahore

Cricket House, Lahore has a continuous common-area electrical load comprising emergency lighting, corridor lighting, staircase lighting, lifts, fire alarm system, CCTV, access control system, internet/network equipment and other essential services that require reliable and uninterrupted power supply.

Presently, these common-area loads are primarily supplied through the utility grid, with diesel generator backup available during power outages. This results in increased electricity consumption and fuel expenditure, particularly during prolonged utility power interruptions.

Based on the revised site survey and assessment of the available roof area and electrical load, it is proposed to install a 14 kW Hybrid Solar Photovoltaic (PV) System integrated with a 16 kWh Lithium Battery Energy Storage System (BESS) at Cricket House, Lahore.

The proposed hybrid solar system is intended to provide the following benefits:

1. Reduction in monthly electricity consumption from the national grid.
2. Reduction in diesel generator operation and associated fuel costs.
3. Provision of battery backup for essential common-area electrical loads during utility power failures.
4. Improved reliability and continuity of critical building services.
5. Better utilization of the available roof area for renewable energy generation.
6. Long-term reduction in operational and energy costs for PCB.
7. Reduction in dependence on conventional energy sources and improvement in the overall energy efficiency of Cricket House.

2. Supply and installation of 16 kWh Lithium-Ion Battery Energy Storage System (BESS) suitable for hybrid solar application.
3. Supply and installation of 15 kW, 3-phase Hybrid Multi-MPPT Smart Inverter, suitable for grid-connected and battery backup operation.
4. Design and installation of galvanized/aluminium solar panel mounting structures, including all required supports, fasteners and accessories.
5. Supply and installation of DC and AC cables, conduits, cable trays, connectors, glands, lugs and other associated accessories.
6. Provision of required DC/AC protection and isolation devices, including DC combiner/protection arrangements, DC isolators, AC breakers, surge protection devices and other necessary protective equipment.
7. Provision of appropriate earthing and lightning protection arrangements for the solar PV system, inverter, mounting structures and associated equipment.
8. Integration of the hybrid solar system with the existing electrical distribution system of Cricket House.
9. Integration and configuration of the battery storage system to provide backup power to identified essential common-area loads.
10. Provision of a solar inverter monitoring/energy management system, including remote/local monitoring of solar generation, battery status, grid import/export and system performance, where applicable.
11. Necessary modifications to existing electrical panels, distribution boards and associated wiring required for proper integration of the system.
12. Testing of all equipment, cabling, protection systems, earthing and associated installations.
13. Complete testing, commissioning and performance verification of the installed system.
14. Submission of as-built drawings, equipment manuals, test reports, warranties and operation & maintenance documentation upon completion.
15. Training of designated PCB technical/maintenance staff regarding operation, monitoring and basic maintenance of the system.

The contractor shall be responsible for providing a complete, safe, reliable and fully operational system, including all minor materials, accessories, fittings and works necessary for successful completion, whether specifically mentioned above or not
