A negative determination will result in rejection of the Bidder's Bids, in which event the Procuring Agency will proceed to the next ranked Bidder to make a similar determination of that Bidder's capabilities to perform

satisfactorily.

AMR meters would be declared muted if the last successful read was before 48 hours. Number of such muted meters shall not be more than 2% at any point upto the warranty period within the system. MDC should be able to retrieve missing data from meters after restoration without compromising system performance also issues regarding error in data or missing data shall be treated as meter mute. As SIMs are to be arranged by QESCO, this information related to best network availability should be

collected from telecom services provider instead of bidder. Missing Read means Missing of schedules and on demand data. Error in data means incomplete/wrong data receiving at MDC. This will be checked through MDM as vendor's MDC will be available at MDM.

- u) In case of number of muted meters exceeds more than 2% as pointed out by Incharge AMI Cell QESCO/PITC, an investigation shall be conducted into the matter and reasons other than declared scheduled communication outage by the Network provider, transformer damages, scheduled load shedding, cable breakdowns and ERO etc., shall be on Bidder's liability. If it is observed that the muted meters ratio is more than 2%, the Supplier will be responsible to take remedial measures which includes but not limited to replacement of such meters, upgradation of software patches etc. or any other remedy proposed by the QESCO. - y) In case of delay of retrieval of readings beyond two minutes, an investigation shall be conducted into the matter and reasons other than the transformer damages, scheduled load shedding, ERO / disconnection etc., shall be on Bidder's liability. The meters should communicate at Signal Strength of -95dBm to -105dBm. Vendors will get it tested also to the satisfaction of the QESCO. If it is observed that the meter modem signal strength is lower than the one mentioned above, the Supplier will be responsible to replace / repair the meter under warranty. Retry Failure rate should not be more than 5 times. The Time out for each retry should not be more than 30 seconds.
